PROFESSIONAL SUMMARY

Enthusiastic developer with strong problem-solving skills and experience in software development, full-stack web applications, and artificial intelligence. Proficient in Java, Python, JavaScript, SQL, REST APIs, and machine learning, with hands-on experience building scalable applications and AI-powered systems. Passionate about creating innovative, user-focused solutions and continuously expanding technical expertise.

EDUCATION

Dr. N.G.P. Institute of Technology, Coimbatore

2023 – 2027

B. Tech – Artificial Intelligence and Data Science

CGPA: 8.43

Sowdambikaa Matriculation Higher Secondary School, Trichy

2022 – 2023

Percentage: 88%

TECHNICAL SKILLS

Languages: Java, C, JavaScript, Python, SQL

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Backend: Spring Boot, Node.js, Flask, FastAPI, REST APIs

Databases: MySQL, PostgreSQL

Tools: Git, GitHub, VS Code, Postman

Concepts: OOP, DSA, DBMS, Operating Systems

PROJECTS

ResearchGPT – AI-Powered Research Platform

- Developed a full-stack AI research platform using semantic search and Retrieval-Augmented Generation (RAG).
- Designed and implemented RESTful APIs for document upload, retrieval, and secure user authentication.
- Built a responsive frontend using React and integrated PostgreSQL for efficient data storage and retrieval.

AI Mental Health Chatbot

- Developed a full-stack AI-powered mental health chatbot with secure user authentication and real-time messaging.
- Built RESTful APIs using Flask for real-time chatbot communication and request handling.
- Integrated sentiment analysis to provide context-aware responses and enhance user interaction.

NeuroScan AI – Brain Tumor Detection System

- Developed an AI-powered healthcare application for brain tumor detection from MRI images using Convolutional Neural Networks (CNNs).
 - Built a Flask-based web application for real-time image upload, preprocessing, and prediction.
 - Integrated TensorFlow and OpenCV to deliver accurate MRI image classification.
-

ACHIEVEMENTS

- Solved 500+ Data Structures and Algorithms problems on LeetCode.
- Built and deployed full-stack web applications using modern frontend and backend technologies.
- Developed AI-powered applications leveraging machine learning, deep learning, NLP, and Retrieval-Augmented Generation (RAG).
